Alerts are used in EasyChair to attract your attention to something that requires your response. They are normally created as a result of actions of other people. For example, when somebody asks you to make a review, a subreviewer alert will appear amongst your alerts.

For nearly each of these alerts, you can remove them either by making your response to the alert or simply dismissing the alerts without a response.

Your alerts are shown and explained below. Follow the "view" link to view or respond to them. If you do not want a particular alert at all, click on its "dismiss" column.
